## D.K.M.COLLEGE FOR WOMEN (AUTONOMOUS), VELLORE-1.

 DEPT OF COMMERCE WITH COMPUTER APPLICATIONS 15CACC3A -BUSINESS STATISTICS - SEM III UNIT-I INTRODUCTION :Statistics - Definition -scope and limitations - Collection of data - secondary \& primary data - questionnaire - classification and tabulation - Types of sampling methods - Simple, Random, systematic, Stratified and duster -sampling error.

## UNIT - II MEASURES OF CENTRAL TENDENCY AND DISPERSION.

Mean, Median and Mode -Dispersion - Range - Quartile, Mean, standard deviations. Measures of skewness.

## UNIT - III CORRELATION

Karl Pearson's co-efficient of correlation - spearman's Rank correlation -regression lines and co-efficient of correlation.

## UNIT -IV TIME SERIES ANALYSIS

Trend -seasonal variations - Interpolation - Newtons and Lagrange's method of estimation.

## UNIT -V INDEXNUMBERS

Aggregate and relater index- chain and fixed index - whole sale and cost of luring index.

## UNIT- I INTRODUCTION SEC-A 2 MARKS

1. Define statistics.
2. Give any two functions of statistics.
3. Write any two limitations of statistics.
4. Write any two applications of statistics.
5. Define a population
6. What is sampling?
7. Explain population?
8. What is finite population?
9. What is infinite population?
10. Name the types of sampling?
11. Name the types of sampling?
12. Give the methods of selection of samples.
13. What are the types of stratified random sampling.
14. How will you classify data?
15. What are the types of classification?
16. What do you understand by measures of central tendency?
17.Define mean
17. Define median
18. Define mode.
19. Give the characters of dispersion.
20. What is Range?
21. Give the meaning of skewness.
22. Calculate mean. 2,4,6,8,10.
23. What is correlation?
24. Define regression?
25. What is rank correlation?
26. What is meant by Time series?
27. What are the four categories of time series?
28. What is meant by index number?
29. Give the classification of index numbers?
30. What is meant by index number?
31. Give the classification of index numbers?

## SEC - B 5 MARKS

1. What is sampling? Give the principles of sampling and explain sampling errors.
2. Define sampling. Give its advantages and disadvantages.
3. Explain the types of sampling in detail.
4. What is stratified Random sampling?
5. What is systematic sampling? Give its merits and demerits?
6. What is a primary data? Give its merits and demerits.
7. What is secondary data? Give its merits and demerits.
8. What is classification? And objects of classification.
9. Calculate arithmetic Mean.
