

## 6. EXTENSION ACTIVITY REPORT

PG & Research Department of Chemistry has conducted extension activities on 03.01.2020 at Government School, Edayansathu, Vellore-2. All our UG, PG and M.Phil Chemistry students were actively participated in this event.

The objective of this school visit was

- ❖ To motivate the school students in the field of science especially in chemistry.
- ❖ To encourage the students and also to provide a perfect platform for the students to gain extra scientific knowledge.
- ❖ To discuss and demonstrate the adulterants present in the food materials.

The following activities were successfully being conducted in this extension activity

- ❖ **Practical Demonstration of Food Adulteration**
- ❖ Quiz competitions
- ❖ Games

### **Practical Demonstration of Food Adulteration**

In the Practical demonstration, identification of adulterants in Milk, Turmeric, Chilli powder, Ghee, Sugar ,Ice-cream were shown by experimental methods. The students got awareness about the common adulterants in Food items and how they can be identified by simple chemical reactions.

### **Quiz Competition**

Quiz competition was conducted among the students. Totally 10 teams were involved actively, IQ and EQ based questions were asked. Students were participated more enthusiastically and dynamically.
