<i>Organizing Committee</i>			

All are welcome

D.K.M College for Women (Autonomous), Vellore

MHRD Institutions Innovation Council (IIC) and Department of Biochemistry

More and more women in India are now taking up jobs and it is a right step in the direction for their economic emancipation and independence. This is also the direct result of emphasis on women's employment by our planners and many grassroots groups as the means of improving their economic and social position. Women are now entering the job market in

bigger numbers to have equality with men. However, this goal may not be achieved simply by being gainfully employed because employed women are now doubly burdened as they have to work both in the office/factory and home. They enjoy neither greater choice nor better standards of living. Employment of women is also desirable because their earnings and incomes go towards the welfare of children and family. Moreover, employment of women goes a long way in their empowerment.

In order to improve the livelihoods of girl students from the informal economy, through various initiatives using technology, technical training, microfinance, market linkages etc., We the Department of Biochemistry along with MHRD Institutions Innovation Council (IIC)DKMC, organized a Seminar on **“Self Employment Opportunities For Women”** on 17.3.2021 at 2.00pm at D-Block Conference Hall of D.K.M. College premises. **Dr.V.Anitha, Natural Living Social Activist- Trichy** acted as chief guest, Er.D.Maninathan Sir and Dr.T.Sivakumar sir are patrons of this programme. This programme was Headed by Dr.P.N.Sudha, Principal of the College, Dr.C.Vinothini, Dr.V.Rekha Mrs.S.Saranya, Dr.A.Amirthavalli acted as the programme Coordinators, Dr. V.Prabha ,H.O.D, Dr.B.Hebsibah Elsie, Dr.S.Asha, Mrs.G.Nithya, Dr.K.Shoba are the Organizing Committee for the programme.

The programme mainly focused on to strengthen the scaling-up of the students and how to manage tiny and microenterprises, which will throw up ample employment and work opportunities for students in the informal economy. Nearly 100 UG and Pg students were benefited and learned how to make and market the products like herbal sanitary pads, hair oils, herbal soaps, and health powder etc., Despite significant problems in a male dominated society, Indian women have found their way out for growth and empowerment either through self-help groups, NGOs, banks, government assistance, and micro finance institutions or through private sectors. In the coming years, the role of women will be of immense importance for competing with the developed world as they are man power source as well as diverse consumer group. The civilization of the country will undergo a noteworthy positive change with educated and financially sound women folk. The seminar clearly educated that access to microfinance, secure

full employment; preventive and low cost curative health care at the doorstep can empower the students community .
