

**DKM COLLEGE FOR WOMEN (AUTONOMOUS), VELLORE-1**

**MHRD IIC & DKMC ENVIRO CLUB**

**Observation of National pollution control day & National energy conservation day-Report**

**2021-2022**

**National Pollution Control Day**

India observes National Pollution Control Day on December 2 in the memory of people who lost their lives in Bhopal gas disaster. Bhopal disaster, chemical leak on December 2 in 1984 in the city of Bhopal, Madhya Pradesh state, India. It was the worst industrial accident in history in that time. About 45 tons of methyl isocyanate gas leaked from that insecticide plant. The gas drifted over the densely populated neighbourhoods around the plant, killed thousands of people. Million survivors suffered with respiratory problems, eye irritations, blindness, and other maladies resulting from exposure to the toxic gas.

**National energy conservation day**

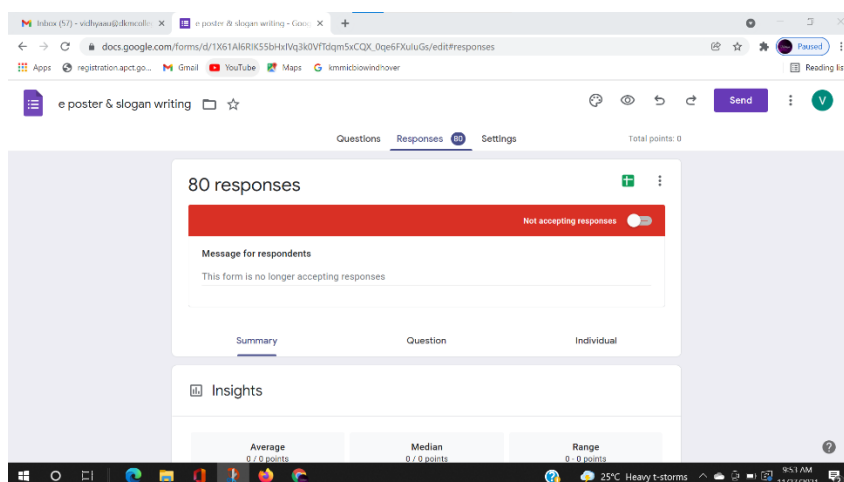

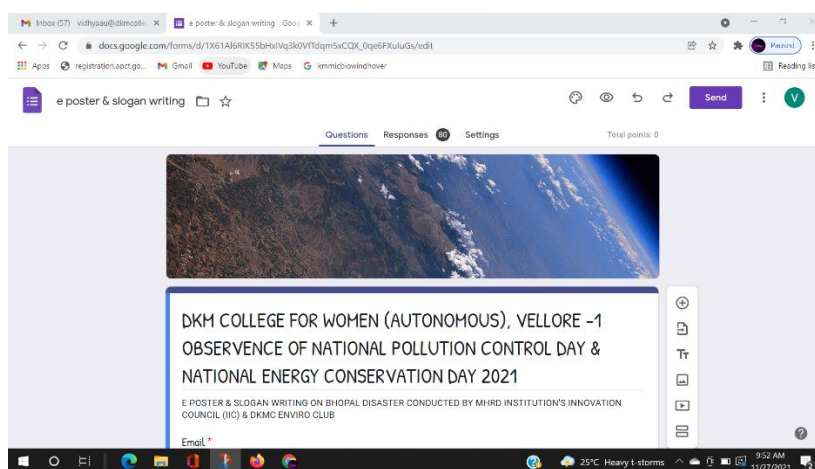

National energy conservation day is celebrated every year by the people all over the India on 14<sup>th</sup> of December. The Energy Conservation Act in India was executed by the Bureau of Energy Efficiency (BEE) in the year 2001, helps in the development of policies and strategies in order to reduce the energy use. National energy conservation day in India is celebrated to make people aware about the importance of energy conserving and to avoid wastage of energy resources.

**Observance of National pollution control day & National energy conservation day at our College**

The MHRD IIC & DKMC Enviro club, have jointly organized an e poster presentation & slogan writing competition on 'Bhopal Disaster- Facts, Causes and Effects' in view of Observation of National pollution control day & National energy conservation day on 20.11.2021.

The main aim of conducting the competitions were to create awareness and to educate among students about Bhopal disaster. That may help them in managing and controlling industrial disasters, prevent the pollution produced either by industrial processes or by human negligence.

Totally 80 responses received from the various departments of Aided and Unaided stream. Students were enthusiastically participated. Best posters and slogans were selected by the experts and the prizes were awarded for those students. All the participants were appreciated and e certificates were distributed.

Methyl Isocyanate

1984 The Bhopal disaster, also referred to as the Bhopal gas tragedy, was a gas leak incident on the night of 2–3 December 1984 at the Union Carbide India Limited pesticide plant in Bhopal, Madhya Pradesh, India.

BHOPAL 1984  
WORLD'S WORST INDUSTRIAL DISASTER

On the night of 3 Dec 1984, thousands died as 30 tonnes of highly toxic Methyl isocyanate gas leaked from the Union Carbide factory in Bhopal, Madhya Pradesh.

BORN CURSED

The foetus of a 1984 Bhopal gas tragedy victim remains preserved at the Medico-Legal Institute in Bhopal. The impact of the poisonous gas, methyl isocyanate or MIC, has now passed on to the second and third generations of the victims. More number of people suffer from exposure to the toxic gas now than immediately after the tragedy.

BHOPAL DISASTER  
DECEMBER 2, 1984

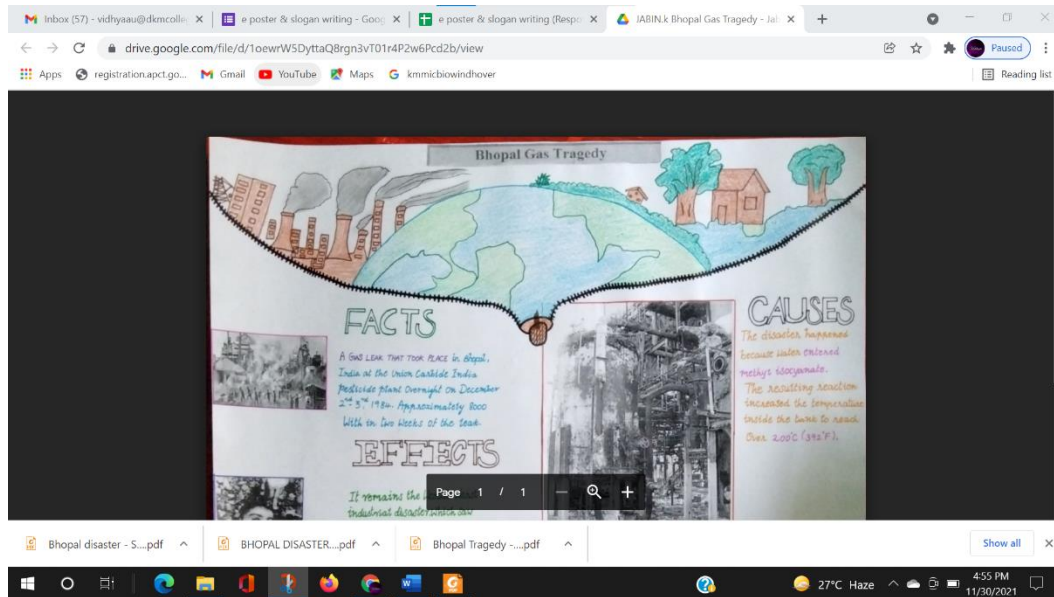

The human cost (estimates)

- Up to 10,000 deaths in first three days
- Additional 25,000 people died of related injuries by 1994

M.Sneha, I M.Sc., Microbiology, D.K.M College, Vellore.
