ARTIFICIAL INTELLIGENCE AND MENTAL HEALTH: BRIDGING THE GAP

Program Objective:

The multidisciplinary seminar was scheduled along with the Department of Artificial intelligence to let the students know the involvement of artificial intelligence in providing psychotherapies to the humans.

Date	:	02.11.2023
Time	:	1.00 p.m to 2.00 p.m
Venue	:	Kaveri Conference Hall
Speaker	:	<i>Dr.R. Hamsaveni., M.Sc., M.Phil., Ph.D</i> <i>Assistant Professor and Head</i> <i>Department of Data Science</i> <i>DKM College For Women [Autonomous],Vellore-1</i>
No of participants	:	50 students of I, II, III B.Sc Psychology and I B.Sc AI and DS

Report:

The program was started by 1.00 p.m at Kaveri Conference Hall. Mrs.Aarthi. D, Head of the Department has introduced the resource person and felicitated. The speaker then taken up the session and spoke about the fundamentals of Artificial Intelligence, Artificial intelligence used in medical sciences, radiology, psychological research and psychotherapy.

The speaker had given a clear presentation on the basics of machine languages and how it works technically during psychological sessions. The history of the robot ELIZA was shared to the participants. Most of the presentation had given insights on how artificial intelligence supports the practitioners during the session.

Virtual Reality therapy and the safety features were also discussed during the session. At the end of the session students were given an activity to discuss on the topic, “whether AI can replace humans in providing therapies” was conducted among the students of Psychology and Artificial intelligence. The activity session was very interesting and students were able to get to know the beneficial and flip sides of AI involved in Psychotherapies.

The session ended up at 2.00 p.m. after Ms.Soniya.K., Assistant Professor of Psychology has proposed the vote of thanks and students have shared their feedbacks.
