**Dr. T. SIVAKUMAR, M.A., PRESIDENT**

## **REPORT OF POSTER MAKING AND DESIGNING PROGRAM ON“CERVICAL CANCER”**

D.K.M. College for Women (Autonomous), Vellore, PG and Research Department of Biochemistry in Association with In Association with Saaral Women’s Lions Club, Vellore, organize an "Awareness Programme on Cervical Cancer" on 29<sup>th</sup> January 2024, at the D Kaveri Conference Hall from 12:30 PM to 4:00 PM. The performance of "Silent prayer" opened the programme. Dr. B. Hebsibah Elsie, Assistant Professor, Department of Biochemistry, welcomed the gathering and the chief guest a heartfelt greeting to the ceremony.

Some people are confused about the differences between ovarian cancer and cervical cancer, and may even think that they are the same or similar diseases. While both are gynecologic cancers, they affect different parts of the reproductive system, and have different risk factors, symptoms, treatment and survival rates. Cervical cancer is found in the cervix, which is the narrow, lower part of the uterus where it connects to the upper end of the vagina, while ovarian cancer often originates in the fallopian tubes or the ovaries, which are reproductive organs on each side of the uterus in the pelvis.

Education and outreach effects for cervical cancer are usually observed during month of January. There was a poster presentation after that. More than fifty students actively participated in this programme, displaying posters about causes, screening tests, symptoms, vaccines, therapies, etc. They also won cash awards and beautiful prizes.

**I - Prize – S.Yamuna (II M.Sc .Zoology)**

**II - Prize – N.Meenakshi (II .B.Com (CA))**

**III – Prize – V. Nevethitha (II .B.Sc Microbiology)**

At the conclusion of the programme, Dr. V. Prabha, Head and Assistant Professor of Biochemistry, offered a vote of gratitude to all those who had contributed and attended the awareness programme. The national anthem heralded the program's exciting finale.
