D.K.M COLLEGE FOR WOMEN

VELLORE - 1

(AUTONOMOUS)

B.Sc Data Science

SYLLABUS

Under
CHOICE BASED CREDIT SYSTEM (CBCS)
[With effect from the year 2023 – 2024]

D.K.M. COLLEGE FOR WOMEN (AUTONOMOUS)
DEPARTMENT OF DATA SCIENCE

PROGRAMME EDUCATIONAL OBJECTIVES

PEO1: Graduates will have skills and knowledge to excel in their professional career in Data Science and its related disciplines.

PEO2: Graduates will be ethically and socially responsible solution providers in Data Science and successfully pursue higher education in reputed institutions.

PROGRAMME OUTCOME

PO1: Problem Analysis: To identify, formulate and analyze complex Data Science and Applications problems in the areas of hardware, software, theoretical Data Science to reach significant conclusions by applying Mathematics, Natural sciences, Accounts, Computer Science and Applications principles.

PO2: Design & Development of Solutions: To design and build a system, component, process or a program for complex problems by factoring in all the requirements and various design tradeoffs, with appropriate consideration for the public health and safety, cultural, social and environmental factors

PO3: Modern Tool Usage: To create, select and apply state of the art tools and techniques in designing, developing and testing a computing system or its component.

PO4: Ethics: To apply professional ethics and cyber regulations, responsibilities and pledge to the norms of professional computing practice.

PO5:Environment and Sustainability: To demonstrate the knowledge of sustainable development of computing systems/products/solutions with an understanding of the impact of these solutions on the Society and Environment.

PO6: Life – long Learning: To spot the need for and engage in lifelong learning to cope up with the rapidly evolving disciplines of Computer Science and applications domains.

D.K.M COLLEGE FOR WOMEN (AUTONOMOUS), VELLORE – 1

Problem solving and Python Programming

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
I		Core Paper – 1	7	105	7	105	-	-	4

COURSE OBJECTIVE

1. To understand the basics of algorithmic problem solving.
2. To learn to solve problems using Python conditionals and loops.
3. To define Python functions and use function calls to solve problems.
4. To use Python data structures – lists, tuples, dictionaries to represent complex data.
5. To do input/output with files in Python.

COURSE OUTCOME

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level (K1 – K4)
CO1	Develop algorithmic solutions to simple computational problems.	K2
CO2	Develop and execute simple Python programs. Write simple Python programs using conditionals and looping for solving problems.	K3
CO3	Decompose a Python program into functions.	K1
CO4	Represent compound data using Python lists, tuples, dictionaries etc. Develop algorithmic solutions to simple computational problems.	K2
CO5	Develop and execute simple Python programs and Read and write data from/to files in Python programs.	K3

Knowledge Level – K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze

MAPPING WITH PROGRAMME OUTCOME

CO5	S	S	S	M	S	M

S – Strong   M– Medium   L –Low

SYLLABUS

UNIT	Contents	No. Of. Hours
I	**COMPUTATIONAL THINKING AND PROBLEM SOLVING:** Fundamentals of Computing – Identification of Computational Problems -Algorithms, building blocks of algorithms (statements, state, control flow, functions), notation (pseudo code, flow chart, programming language), algorithmic problem solving, simple strategies for developing algorithms (iteration, recursion). Illustrative problems: find minimum in a list, insert a card in a list of sorted cards, and guess an integer number in a range, Towers of Hanoi.	**23 Hrs**
II	**DATA TYPES, EXPRESSIONS, STATEMENTS:** Python interpreter and interactive mode, debugging; values and types: int, float, boolean, string, and list; variables, expressions, statements, tuple assignment, precedence of operators, comments; Illustrative programs: exchange the values of two variables, circulate the values of n variables, distance between two points	**19 Hrs**
III	**CONTROL FLOW, FUNCTIONS, STRINGS:** Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: state, while, for, break, continue, pass; Fruitful functions: return values, parameters, local and global scope, function composition, recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as arrays. Illustrative programs: square root, gcd, exponentiation, sum an array of numbers, linear search, binary search	**21 Hrs**
IV	**LISTS, TUPLES, DICTIONARIES:** Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Dictionaries: operations and methods; advanced list processing – list comprehension; Illustrative programs: simple sorting, histogram, Students marks statement, Retail bill preparation.	**21 Hrs**
V	**FILES, MODULES, PACKAGES:** Files and exception: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages; Illustrative programs: word count, copy file, Voter's age validation, Marks range validation (0-100).	**21 Hrs**
	TOTAL HOURS	**105 Hrs**

Distribution of Marks: Theory: 75% and Applications 25%

2. Dr.M.Vasumathy , Assistant Professor, Department of Computer Science and Applications

Problem solving and Python Programming Lab

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
I		Core Practical-1	3	45	-	-	3	45	3

COURSE OBJECTIVE

1. To understand the tokens of Python.
2. To learn Multithreading in Python.
3. To learn about the concept of data interpretation and visualization concepts
4. To understand how to Visualization.

SYLLABUS

S.No	List of Programs
1	A) Create a list and perform the following methods 1) insert() 2) remove() 3) append() 4) len() 5) pop() 6) clear()
	B) Write a python program to add two numbers.
2	A) Write a python program to print a number is positive/negative using if-else.
	B) Write a python program to find largest number among three numbers.
	C) Write a python Program to read a number and display corresponding day using if_elif_else?
3	A) Write a program to create a menu with the following options 1. TO PERFORM ADDITITON 2. TO PERFORM SUBTRACTION 3. TO PERFORM MULTIPICATION 4. TO PERFORM DIVISION Accepts users input and perform the operation accordingly. Use functions with arguments.
	B) Write a python program to check whether the given string is palindrome or not.
	C) Write a python program to find factorial of a given number using functions
4	A) Write a program to double a given number and add two numbers using lambda()?
	B) Write a program for filter() to filter only even numbers from a given list
	C) Write a program for map() function to double all the items in the list?
	D) Write a program to find sum of the numbers for the elements of the list by using reduce()?

5	A) Demonstrate a python code to implement abnormal termination?

	B) Demonstrate a python code to print try, except and finally block statements
6	A) Write a python program to open and write "hello world" into a file?
	B) Write a python program to write the content "hi python programming" for the existing file
7	A) Write a program to find sum of two numbers using class and methods
	B) Write a program to read 3 subject marks and display pass or failed using class and object.
8	A) Using a numpy module create an array and check the following: 1. Type of array 2. Axes of array 3. Shape of array 4. Type of elements in array
	B) Using a numpy module create array and check the following: 1. List with type float 2. 3*4 array with all zeros 3. From tuple 4. Random values
9	A) Write a python code to set background color and pic and draw a circle using turtle module for Data Visualization
	B) Write a python code to set background color and pic and draw a square and fill the color using turtle module for Data Visualization
10	A) Write a python code to read a csv file using pandas module and print the first and last five lines of a file for Data Visualization
	B) Plot Data from Excel File in Matplotlib using Python

Distribution of Marks: Program Output with Viva voce: 85% and Record:15%

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
II		CORE PRACTICAL – 2	3	45	-	-	45	45	3

COURSE OBJECTIVE

1. Use an integrated development environment to write, compile, run, and test simpleobject-oriented Java programs.
2. Read and make elementary modifications to Java programs that solve real-world problems.
3. Be able to create an application using string concept.
4. Be able to create a program using files in application.
5. Be able to create an Applet to create an application.

Lab Exercises:
1. Program using Class and Object.
2. Program using Constructors.
3. Program using Command-Line Arguments.
4. Program using Random Class.
5. Program using Vectors.
6. Program using String Tokenizer Class.
7. Program using Interface.
8. Program using all forms of Inheritance.
9. Program using String class.
10. Program using String Buffer class.
11. Program using Exception Handling.
12. Implementing Thread based applications
13. Program using Packages.
14. Program using Files.

Applets:
15. Working with Colors and Fonts.16.Parameter passing technique.
16. Drawing various shapes using Graphical statements.
17. Usage of AWT components and Listener in suitable applications.

Distribution of Marks: Program Output with Viva voce: 85% and Record: 15%

III		SB PRACTICAL – I	2	30	0	0	2	30	2

COURSE OBJECTIVE

1. This practical enables the student to learn open source software like HTML, CSS, JAVA SCRIPT, VB SCRIPT and XML in Web Designing.

2. It also helps to expose students to free open source software environment and introduce them to use open source packages.

COURSE OUTCOME

On the successful completion of the course, students will be able to learn

CO Number	CO Statement	Knowledge Level (K1 – K4)
CO1	Learn to create HTML web pages and their links	K1
CO2	Can Design various cascading Stylesheets	K3
CO3	Learn to implement Dynamic web pages using JAVA Script	K2
CO4	Apply knowledge to Create Dynamic web pages using VB Script	K3
CO5	Learn the basics of XML	K2

➢
Knowledge Level – K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze

Mapping with Programme Outcome

CO4	S	S	S	S	S	M
CO5	S	M	S	M	S	M

S – Strong   M – Medium L – Low

UNIT	Contents	No. Of. Hours
I	**BASIC OF HTML** Basic- Introduction to HTML -List -Creating table -Linking document frames	**6**
II	**STYLE SHEET & ITS PROPERTIES** Graphics to HTML doc -Style sheet basic -Add style to document - Creating style sheet rule -Style sheet properties.	**7**
III	**JAVASCRIPT** **6 Hrs** Introduction to JavaScript - JavaScript syntax -Data type -Variable -Array - Operator and expression -Looping constructor - Function -Dialog box.	**5**
IV	**VB SCRIPT** VB script - Introduction to VB script -Variables - Constants - Arrays - Operators - Control structures - Functions & Methods	**6**
V	**XML** XML - Introduction to XML – Basic programming – Elements and Attributes – Document Type Definitions (DTD) – Schema.	**6**
	TOTAL HOURS	**30**

PRACTICAL EXERCISE

1. Create a static web page which defines all text formatting tags of HTML in tabular format
2. Create a web page including list, image and links.
3. Create a web page implementing Inline and Embedded Stylesheets
4. Create a web page implementing External Stylesheet.
5. Create an array, display its content using JavaScript
6. Create a web page that utilizes cookie information using JavaScript.
7. Create a dynamic web page which prints Fibonacci series from 1 to 10 in VBScript
8. Create a dynamic web page which prints factorial of a given number in VBScript
9. Create a simple XML file and also create dynamic web page in which XML tags are used.

Distribution of Marks: Program Output with Viva voce: 85% and Record: 15%

Cloud Computing Lab

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
IV		CORE PRACTICAL – 3	3	45	-	-	45	45	3

COURSE OBJECTIVE

1. To develop web applications in cloud
2. To learn the design and development process involved in creating a cloud based application
3. To learn and Practice Schedule algorithm
4. Understand transfer of file form one virtual machine to another
5. To implement and use parallel programming using Hadoop

Lab Exercises:

1. Install & experiment Virtual box/VMware Workstation with different flavours of linux or windows OS withvirtualization support

2. A C compiler in the virtual machine created using virtual box and execute Simple Programs

3. Google App Engine. Create hello world app and other simple web applications using python/java.

4. Simulate a cloud scenario using CloudSim and run a scheduling algorithm that is not present in CloudSim.

5. A procedure to transfer the files from one virtual machine to another virtual machine.

6. A procedure to launch virtual machine using trystack (Online Openstack Demo Version)

7. Hadoop single node cluster and run simple applications like word count.

Distribution of Marks: Program Output with Viva voce: 85% and Record: 15%

			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
IV	21SCS41	Skill Based Practical – II	2	30	0	0	2	30	2

COURSE OBJECTIVE

1. This practical helps to introduce the students with the architecture and operation of typical microprocessors and microcontrollers.

2. To familiarize the students with the programming and interfacing of microprocessors and microcontrollers.

3. To provide strong foundation for designing real world applications using microprocessors and microcontrollers.

COURSE OUTCOME

On successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	Learn basic knowledge of microprocessor	K1
CO2	Acquire technical knowledge and perform specific technical tools,	K2
CO3	Understands the basic concept of OPCODE	K3
CO4	Use Microprocessor to perform logical and arithmetic operations	K3
CO5	Create controls for digit transactions programs	K4

Knowledge Level – K1-Remember, K2- Understand, K3-Apply, K4-Analye

Relational Database Management System

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
V		CORE PAPER-6	6	90	6	90	-	-	4

COURSE OBJECTIVES

1. The students are able to understand database concepts and database management system software and have a high-level understanding of major DBMS components and their function.
2. The students are able to understand the E R model and relational model.
3. The students are able to be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
4. The students are able to Understand Functional Dependency and Functional Decomposition.
5. The students are able to understand the architecture of database management system and also understand the various different architecture such as server system architecture, parallel systems and distributed database systems.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To describe the database architecture and its applications Sketch the ER diagram for real world applications Uses various ER diagram for a similar concepts from various sources.	K2
CO2	To understand the relational algebra and calculus Construct various queries in SQL and PL/SQL Compiles various queries in SQL, Relational Calculus and Algebra.	K1
CO3	To understand the various normalization forms Apply the normalization concepts for a table of data Practices a table and implement the normalization concepts.	K3
CO4	To understand the storage and accessing of data.	K3
CO5	To understand the query processing in database management. Define the concurrency control and deadlock concept	K4

1. Mrs. G.SANGEETHA LAKSHMI, Assistant Professor & HOD, Dept of Computer Science & Applications.

2. Mrs.S. KALAISELVI, Assistant Professor, Dept of Computer Science & Applications.

DATA VISUALIZATION TECHNIQUES LAB

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
V		CORE PRACTICAL–5			-	-	3	39	3

COURSE OBJECTIVE

1. To understand basic concepts of R syntax.

2. To understand concepts of data structures.

3. To understand the concepts of data cleaning and data wrangling.

4. To understand the basic concepts of statistical analysis and modelling

5. To understand the basic concepts of various supervised learning methods.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand basic concepts of R syntax.	K2
CO2	To understand concepts of data structures.	K1
CO3	To understand the concepts of data cleaning and data wrangling.	K3
CO4	To understand the basic concepts of statistical analysis and modelling	K3
CO5	To understand the basic concepts of various supervised learning methods.	K4

LAB EXERCISES
1. Acquiring and plotting data
2. Statistical Analysis such as Multivariate Analysis, PCA, LDA, Correlation, regression and analysis of variance
3. Financial analysis using Clustering, Histogram and HeatMap
4. Time-series analysis stock market
5. Visualization of various massive dataset Finance - Healthcare - Census -Geospatial
6. Visualization on Streaming dataset (Stock market dataset, weather forecasting)
7. Market-Basket Data analysis-visualization
8. Text visualization using web analytics.

SYLLABUS DESIGNERS

1. Mrs. G.SANGEETHA LAKSHMI, Assistant Professor & HOD, Dept of Computer Science & Applications.

2. Mrs. S. DIVYA, Assistant Professor, Dept of Computer Science & Applications.

Relational Database Management Laboratory

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
V		CORE PRACTICAL -6	-	-	-	-	3	39	3

COURSE OBJECTIVES

1. Gain a good understanding of the architecture and functioning of Database Management Systems as well as associated tools and techniques.
2. Understand and apply the principles of data modelling using Entityϖ Relationship and Develop a good database design.
3. Understand the use of Structured Query Language (SQL) and itsϖ syntax.
4. Apply Normalization techniques to normalize a database.
5. Understand the need of transaction processing and learn techniques for ϖ controlling the consequences of concurrent data access.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand the database architecture and ER modeling	K2
CO2	To understands the need for the relational model	K1
CO3	To understand the insights of normalization.	K3
CO4	To knows about storage and file organization.	K3
CO5	To understands the essential information regarding query processing and transaction management.	K4

LAB EXERCISES

1. Execute a single line query and group functions.
2. Execute DDL Commands.
3. Execute DML Commands.
4. Execute DCL and TCL Commands.
5. Implement the Nested Queries.
6. Implement Join operations in SQL.

7. Create views for a particular table.

8. Implement Locks for a particular table.

9. Write PL/SQL procedure for an application using exception handling.

10. Write PL/SQL procedure for an application using cursors.

11. Write a PL/SQL procedure for an application using functions.

12. Write a PL/SQL procedure for an application using package.

SYLLABUS DESIGNERS

1. Mrs. G.SANGEETHA LAKSHMI, Assistant Professor & HOD, Dept of Computer Science & Applications.

2. Mrs. S. KALAISELVI, Assistant Professor, Dept of Computer Science & Applications.

Data Communication and Networking

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
V		ELECTIVE-I PAPER- I	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. To understand the architecture of network.

2. To learn channels and its protocols.

3. To know about routing standard in network

4. To learn about the concept transporting a packets

5. To understand the concept of transport layer in network.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To study the concepts of communication networks, protocols and their performance	K2
CO2	To study the concepts of transmission Medium and Error Control	K3
CO3	To learn about Switching Concept	K3
CO4	To study about the X.25layers	K3
CO5	To apply routing Algorithms and understand various internetworking devices.	K4

Wireless sensor network

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
V		ELECTIVE-I PAPER- 2	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. To understand the fundamentals of Wireless Sensor Networks

2. To understand the design and analyze network protocols for WSNs learn channels and its protocols.

3. To understand the data communication techniques in WSNs.

4. To understand and implement localization and tracking techniques

5. To understand the concepts of issuing and challenge in QoS.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand the fundamentals of Wireless Sensor Networks	K2
CO2	To understand the design and analyze network protocols for WSNs learn channels and its protocols.	K3
CO3	To understand the data communication techniques in WSNs.	K3
CO4	To understand and implement localization and tracking techniques	K3
CO5	To understand the concepts of issuing and challenge in QoS.	K4

Data Mining and Data Warehousing

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
V		ELECTIVE -II PAPER- I	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. Introduce the concepts of data ware house and data mining and explain the methodologies used for analysis of da

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand the functionality of the various data mining and data warehousing Component	K2
CO2	To describe different methodologies used in data mining and data ware housing.	K3
CO3	To Explain the analyzing techniques and Online Analytical Processing	K3
CO4	To the association rule mining and classification	K3
CO5	To study and Compare different approaches of data ware housing and data mining with various technologies routing Algorithms and understand various internetworking devices.	K4

Digital Image Processing

Semester	SubjectCode	Category	Lecture Hrs		TheoryHrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		Elective-II Paper -2	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. To understand the basics and fundamentals of digital image processing such as digitization, sampling, quantization, and operations.
2. To gain knowledge on the various techniques for intensity transformations functions and spatial filtering for modify or enhancement of an image.
3. To Compute Discrete Fourier Transform and apply Frequency domain filters for image enhancement.
4. To Understand and Apply Color Models in Digital Image Processing.
5. To Illustrate Morphological operation and Apply image segmentation techniques for various applications.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level(K1-K4)
CO1	To understand the basics and fundamentals of digital image processing such as digitization, sampling, quantization, and operations.	K1
CO2	To gain knowledge on the various techniques for intensity transformations functions and spatial filtering for modify or enhancement of an image.	K3
CO3	To Compute Discrete Fourier Transform and apply Frequency domain filters for image enhancement.	K3
CO4	To Understand and Apply Color Models in Digital Image Processing.	K3
CO5	To Illustrate Morphological operation and Apply image segmentation techniques for various applications	K4

CO5	M	M	S	S	S	S	S	S	M	S

PO – Programme Outcome, CO – Course outcome, S – Strong, M – Medium, L– Low (may be avoided)

UNIT	Contents	No. of. Hours
I	**DIGITAL IMAGE FUNDAMENTALS** Introduction – Fundamental steps in Image Processing Systems – Image Acquisition – Sampling and Quantization – Pixel Relationships – Mathematical Tools Used in Digital Image Processing. Practical Component: Find the representation of image, Reading Images, Writing Images, displaying images, handling image types, and handling operators in images using MATLAB.	16
II	**MORPHOLOGICAL IMAGE PROCESSING** Background - Some Basic Intensity Transformation Functions: Image Negatives, Log Transformations, Power-Law Transformations - Histogram Processing. Fundamentals of Spatial Filtering - Smoothing Spatial Filters - Sharpening Spatial Filters. Practical Component: Apply Various intensity transformations functions, Computing and plotting image histogram.s and use standard image processing toolbox Spatial filters in MATLAB	15
III	**IMAGE SEGMENTATION** Background - Sampling and the Fourier Transform of sampled functions – Discrete Fourier Transform (DFT) - Some Properties of the 2-D Discrete Fourier Transform - The Basics of Filtering in the Frequency Domain - Image Smoothing and Sharpening using Frequency Domain Filters - Selective Filtering. Practical Component: Compute and visualize the 2-D DFT, implement smoothing and sharpening techniques using lowpass and highpass filters in frequency domain in MATLAB.	16
IV	**FEATURE EXTRACTION** Color Fundamentals - Color Models: RGB, CMY, CMYK, and HSI Color Models - Pseudocolor Image Processing - Color Transformations - Color Image Smoothing and Sharpening. Practical Component: Find the representation of color image, Convert to Other Color Spaces, implement color transformations, and implement color image Smoothing and Sharpening in MATLAB.	14
V	**IMAGE PATTERN CLASSIFICATION** Morphological Image Processing: Fundamentals - Erosion and Dilation –	

	Opening and Closing - Some Basic Morphological Algorithms. Image Segmentation: Introduction - Point, Line, and Edge Detection– Segmentation by Region Growing and by Region Splitting and Merging. Practical Component: Implement Morphological operations, image segmentation and region-based segmentation in MATLAB.	**14**

Machine Learning Using MATLAB Lab

Semester	SubjectCode	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		Skill Based Practical - 3		-	-	-	2	26	2

COURSE OBJECTIVES

1. To use Python Libraries/ MATLAB tools for implementing pre-processing algorithms.
2. To solve the problems using Multivariate Linear Regression.
3. To build Logistic Regression, k- Nearest Neighbour / Decision Tree.
4. To use Dimensionality reduction of any CSV/image dataset using Principal Component Analysis.
5. To implement clustering algorithms.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level(K1-K4)
CO1	Implement pre-processing algorithms.	K2
CO2	Solve the problems using Multivariate Linear Regression.	K3
CO3	Build Logistic Regression, k- Nearest Neighbour / Decision Tree.	K3
CO4	Use Dimensionality reduction of any CSV/image dataset using Principal Component Analysis.	K3
CO5	Implement text segment as 'Positive' or 'Negative' statement using the Naïve Bayes Classifier.	K4

Mapping with Programme Outcome

CO5	S	M	M	M	M	M	S	S	S	S

PO – Programme Outcome, CO – Course outcome S – Strong, M – Medium, L– Low (may be avoided)

LAB EXERCISES

1. Installation of Python Libraries/ MATLAB tools for Machine Learning
2. Data pre-processing using Python Machine Learning libraries/ MATLAB.
3. Design a model to predict the housing price from Boston Dataset using Multivariate Linear Regression.
4. Build a classifier using Logistic Regression, k- Nearest Neighbour / Decision Tree to classify whether the given user will purchase a product or not from a social networking dataset.
5. Segment a customer dataset based on the buying behaviour of customers using K- means/Hierarchical clustering.
6. Dimensionality reduction of any CSV/image dataset using Principal Component Analysis.
7. Recognition of MNIST handwritten digits using Artificial Neural Network.
8. Build an email spam classifier using SVM.
9. Classify the given text segment as 'Positive' or 'Negative' statement using the Naïve Bayes Classifier.
10. Predict future stock price of a company using Monte Carlo Simulation.

SYLLABUS DESIGNERS

1. Mrs. G.SANGEETHA LAKSHMI, Assistant Professor & HOD, Dept of Computer Science & Applications.

2. Mrs. R. BHUVANESWARI, Assistant Professor, Dept of Computer Science & Applications.

SEMESTER - VI

Big Data Analytics

Semester	SubjectCode	Category	Lecture Hrs		TheoryHrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		CORE PAPER-7	6	90	6	90	-	-	4

COURSE OBJECTIVES

1. To understand basic concept of big data.

2. To understand data storage concept in big data.

3. To understand basic concept of HADOOP

4. To understand the basic concepts of Map reduce

5. To understand how to store a data in big data and Techniques.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand basic concept of big data.	K1
CO2	To understand data storage concept in big data.	K3
CO3	To understand basic concept of HADOOP	K3
CO4	To understand the basic concepts of Map reduce	K3
CO5	To understand how to store a data in big data and Techniques.	K4

R for Analytics

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		Core Paper- 8	6	90	6	90	-	-	4

COURSE OBJECTIVES

1. To understand and identify use cases, understand the underlying technology and apply virtualization techniques

2. To understand the effective use R for data analysis, visualization, and machine learning, leading to data-driven decision-making.

3. To understand R's syntax, data structures, and libraries, as well as applying statistical methods and machine learning algorithms to real-world problems.

4. To understand the basic concepts of statisctical analysis and modelling

5. To understand the basic concepts of various supervised learning methods.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand basic concepts of R syntax.	K1
CO2	To understand concepts of data structures.	K3
CO3	To understand the concepts of data cleaning and data wrangling.	K3
CO4	To understand the basic concepts of statisctical analysis and modelling	K3
CO5	To understand the basic concepts of various supervised learning methods.	K4

   2. Mrs. P. SHOBANA, Assistant Professor, Dept of Computer Science & Applications.

Big Data Analytics Lab

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		Core Practical – 7		-	-	-	3	39	3

COURSE OBJECTIVES

1. To understand basic concept of big data.

2. To understand concept of Hadoop file system

3. To understand to write word count using mapreduce.

4. To understand the basic concept finding min and max values.

5. To understand the basic concept of MongoDB

COURSE OUTCOMES

CO Number	COStatement	KnowledgeLevel(K1-K4)
CO1	To understand basic concept of big data.	K2
CO2	To understand concept of Hadoop file system	K3
CO3	To understand to write word count using mapreduce.	K3
CO4	To understand the basic concept finding min and max values.	K3
CO5	To understand the basic concept of MongoDB	K4

Mapping with Programme Outcome

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10
CO1	S	S	S	M	M	M	S	M	S	S
CO2	S	S	M	M	S	M	S	M	S	S
CO3	S	M	M	M	S	M	S	M	S	S
CO4	S	S	S	M	S	S	S	S	M	S
CO5	S	M	S	S	S	S	S	S	M	S

PO – Programme Outcome, CO – Course outcome S – Strong, M – Medium, L– Low (may be avoided)

LAB EXERCISES

1. Study of Hadoop
2. Study of Hadoop distributed file system(HDFS)
3. Manipulation of data on HDFS
4. Learning Map Reduce Programming
5. Word count problem using MapReduce Programming
6. Sorting the data using MapReduce.
7. Finding max and min value in Hadoop.
8. No SQL Database Operations using MongoDB

SYLLABUS DESIGNERS

1. Mrs. G.SANGEETHA LAKSHMI, Assistant Professor & HOD, Dept of Computer Science & Applications.

2. Mrs. R. NANDHINI, Assistant Professor, Dept of Computer Science & Applications.

R for Analytics Lab

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		Core Practical – 8		-	-	-	3	39	3

COURSE OBJECTIVES

1. To understand and identify use cases, understand the underlying technology and apply virtualization techniques

2. To understand the effective use R for data analysis, visualization, and machine learning, leading to data-driven decision-making.

3. To understand R's syntax, data structures, and libraries, as well as applying statistical methods and machine learning algorithms to real-world problems.

4. To understand the basic concepts of statisctical analysis and modelling

5. To understand the basic concepts of various supervised learning methods.

COURSE OUTCOMES

CO Number	CO Statement	KnowledgeLevel (K1-K4)
CO1	To understand basic concepts of R syntax.	K2
CO2	To understand concepts of data structures.	K3
CO3	To understand the concepts of data cleaning and data wrangling.	K3
CO4	To understand the basic concepts of statisctical analysis and modelling	K3
CO5	To understand the basic concepts of various supervised learning methods.	K4

Mapping with Programme Outcome

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10
CO1	S	M	M	M	S	M	S	M	M	S

CO3	S	M	M	S	S	M	S	M	S	S
CO4	S	S	M	S	S	M	S	M	S	S
CO5	S	M	M	S	S	M	S	M	S	S

PO – Programme Outcome, CO – Course outcome S – Strong, M – Medium, L– Low (may be avoided)

LAB EXERCISES

1. CSE 1 Credit Download and install R-Programming environment and install basic packages using install.packages() command in R.
2. Learn all the basics of R-Programming (Data types, Variables, Operators etc,.)
3. Write a program to find list of even numbers from 1 to n using R-Loops.
4. Create a function to print squares of numbers in sequence.
5. Write a program to join columns and rows in a data frame using cbind() and rbind() in R.
6. Implement different String Manipulation functions in R.
7. Implement different data structures in R (Vectors, Lists, Data Frames)
8. Write a program to read a csv file and analyze the data in the file in R.
9. Create pie chart and bar chart using R.
10. Create a data set and do statistical analysis on the data using R.

SYLLABUS DESIGNERS

1. Mrs. G.SANGEETHA LAKSHMI, Assistant Professor & HOD, Dept of Computer Science & Applications.

2. Mrs. P.SHOBANA, Assistant Professor, Dept of Computer Science & Applications.

ETHICAL HACKING

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		ELECTIVE-III PAPER -1	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. To understand basic concept of hacking

2. To understand concept of Scanning and enumeration

3. To learn how to program for hacking.

4. To understand the fundamentals of security.

5. To understand the concept of testing and its tools.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand the concepts of hacking	K1
CO2	To understand the concepts of scanning and enumeration	K3
CO3	To understand the concepts of hacking.	K3
CO4	To understand the concepts of security.	K3
CO5	To understand the concepts of testing and its tools.	K4

Mapping with Programme Outcome

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10

Artificial Intelligence and Knowledge Representation

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		ELECTIVE – III PAPER - 2	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. To understand basics of artificial neural network.

2. To understand basics of problem solving methods.

3. To understand and develop objects and reasoning in AI

4. To understand the basic concepts of fuzzy logic.

5. To understand the concepts of speech recognition.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand the concepts of artificial neural network	K1
CO2	To understand the concepts of problem solving methods	K3
CO3	To understand the objects and reasoning in AI.	K3
CO4	To understand the concepts of fuzzy logic.	K3
CO5	To understand the concepts of speech recognition.	K4

Mapping with Programme Outcome

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10

Internet of Things

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		ELECTIVE –IV PAPER - 1	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. To understand the communication technologies in IOT, know the various applications of IOT.
2. To understand the network operator requirements and smart applications.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand basic technologies and concepts of IoT	K2
CO2	To understand the concepts of Applications based on IoT.	K3
CO3	To understand the smart applications of IoT.	K3
CO4	To understand the Health based applications of IoT.	K4
CO5	To understand about the network operator requirements and connectivity.	K3

Mapping with Programme Outcome

Cyber Security

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		ELECTIVE – IV PAPER - 2	5	75	5	75	-	-	3

COURSE OBJECTIVES

1. To understand the basic concept of symmetric chipper

2. To understand block chipper and data encryption standard

3. To understand the concepts of asymmetric chipper

4. To understand the concepts of cryptographic data integrity algorithm

5. To understand the concepts of network and internet security

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	To understand the basic concept of symmetric chipper	K1
CO2	To understand block chipper and data encryption standard	K3
CO3	To understand the concepts of asymmetric chipper	K3
CO4	To understand the concepts of cryptographic data integrity algorithm	K3
CO5	To understand the concepts of network and internet security	K4

Multimedia

Semester	Subject Code	Category	Lecture Hrs		Theory Hrs		Practical		Credits
			Per week	Per Sem	Per week	Per Sem	Per week	Per Sem	
VI		SB PRACTICAL - IV	2	30	-	-	2	30	2

COURSE OBJECTIVES

1. To motivate the students to develop the project using Multimedia concept.

2. To obtain the knowledge about the flash environment which helps them to develop the projects.

COURSE OUTCOMES

CO Number	CO Statement	Knowledge Level (K1-K4)
CO1	Learning the fundamental concepts of Multimedia in flash	K1
CO2	To familiarize the student with the tools of flash.	K2
CO3	To allow student to gain expertise in some specific areas of multimedia and flash.	K2 & K3
CO4	Understanding the importance of flash UI components.	K2
CO5	Analyse the technique of interactive flash tools.	K4

Mapping with Programme Outcome
